

Medical Schools in the United States, 2017-2018

Barbara Barzansky, PhD; Sylvia I. Etzel

The following tables contain data derived from the 2017-2018 Liaison Committee on Medical Education (LCME) Annual Medical School Questionnaire-Part II. The questionnaire was sent in February 2018 to the 147 LCME-accredited medical schools with students enrolled in at least 1 year of the curriculum. There was a 100% response rate. Each questionnaire was reviewed and attempts were made to verify information and to obtain missing data. Data from other years included in the tables were obtained from

^b Of the total increase in the number of medical students, 5761 (36% of the total

increase) is due to new medical schools (ie, those not yet enrolling medical students in 2007-2008) and 10 310 (64%) is due to class size increases in previously established medical schools.

Table 2. Organization of Biomedical Science Content During Each Year of the Preclerkship^a Period, 2017-2018

Approach Used to Organize Biomedical Science Content	No. (%) of Medical Schools	
	First Year of Preclerkship	Second Year of Preclerkship
No. of schools responding	146	141
By disciplines (eg, anatomy, biochemistry)	31 (21)	12 (8)
By organ systems (eg, respiratory system)	72 (49)	108 (77)
Based on functional topic areas (eg, genes and development)	37 (25)	11 (8)
Based on patient presentations/symptoms (eg, sore throat)	6 (4)	10 (7)

^a The preclerkship period is the time before the formal start of required clinical clerkships. In 84 schools (57%), the preclerkship spans 2 complete years; in 57

schools (39%), the preclerkship ends midway through the second year of the curriculum; and in 6 schools (4%), the preclerkship is 1 year in length.

Table 3. Number of In-Class Scheduled Hours per Week^a That Medical Students Spend in Required Activities During the Preclerkship^b Period of the Curriculum

Average No. of Scheduled In-Class Hours per Week	No. (%) of Medical Schools

23-25	47 (32)	41 (29)
26-28	26 (18)	24 (17)
>28	7 (4)	8 (6)

^a In addition to in-class activities, in 145 schools students were assigned required activities outside of class to prepare for in-class sessions. Preparation time averaged less than 5 hours per week in 66 schools (45%), 5 to 10 hours per week

in 55 schools (38%), 11 to 15 hours per week in 10 schools (7%), and more than 15 hours per week in 13 schools (9%); no data were provided by 1 school (1%).

^b The preclerkship period is the time before the formal start of required clinical clerkships.
